Whether the Claim Properly Characterized The Source of Water

The claim contains an ambiguity or possibly a mischaracterization on the water source for the appurtenant right.

A claimant to an appurtenant right must establish that the surface water was taken directly from the stream, or from an auwai that was connected to a stream, at the time of the original conversion of the property to fee simple title.

Claims based on surface water taken from a privately owned distribution system and not from a stream, especially a distribution system that did not exist at the time of the original fee simple conversion, does not establish an appurtenant right to surface water delivered through a privately owned distribution system.

Accordingly, factual and legal questions exist on whether the subject claim for appurtenant rights derives from a diversion that existed at the time of the original fee simple conversion from a stream or an auwai that was then connected to a stream.

In addition, factual and legal questions exist as to whether applicant is required to hold a stream diversion works permit and/or a stream channel alteration permit and whether there is a right to use a privately owned distribution system if the surface water is being diverted through that privately owned distribution system.

Rights Claimed May be Subject to Public Utilities Commission Regulation

The claim asserts a right to use surface water that reaches the claimant's property through a distribution system owned by Wailuku Water Company, LLC

The ability of Wailuku Water Company, LLC to deliver water through that distribution system is the subject of a proceeding pending before the State of Hawaii Public Utilities Commission ("PUC").

Any determination by the Commission on Water Resource Management on claims in which the surface water is delivered through use of the distribution system owned by Wailuku Water Company, LLC must include a condition that the delivery of the surface water is subject to applicable terms, conditions, rules, regulations, decisions, orders, tariffs, and actions of the PUC (collectively "PUC Regulation")

Accordingly, factual and legal questions exist on whether the subject claim for appurtenant rights may be subject to PUC Regulation.

Were Appurtenant Water Rights Extinguished

Appurtenant rights to surface water are created at the time the original conversion to fee simple land. While an appurtenant right to surface water cannot be transferred separately and apart from land to which it attaches, the right can be extinguished.

The appurtenant right to surface water is extinguished if the Grantor of the property transfers the property and either reserves the right to the Grantor or transfers the property without transferring the appurtenant right.

The conveyance document in the chain of title to the subject property contain language to the following effect:

EXCEPTING, RESERVING AND GRANTING, however, unto Grantor, its successors and assigns, all water and water rights (surface and ground water) within or appurtenant to the Property, including the right to develop and utilize the same; provided, however, that in the exercise of said rights, Grantor, its successors and assigns, shall not have the right to drill for water or otherwise disturb the surface of the land or any improvements thereon.

Accordingly, factual and legal questions exist as to whether an appurtenant right has been extinguished.
